*Happy Diwali! Enjoy a celebration of nature's radiance in these photos. Did you know Diwali is one of India's most cherished festivals? Its name means "row of lamps," and it symbolizes the inner light that guides us through darkness. Over time, Diwali has grown into a national celebration embraced by Hindus and various non-Hindu communities. Learn more about Diwali at the link in bio. In these images: 1. Fireflies put on a spectacular light show to attract mates in Great Smoky Mountains National Park, Tennessee. 2. Glowworms shimmer on rocks and ferns in Australia's Claustal Canyon. 3. An aurora borealis streaks the Alaska sky. 4. A bioluminescent mushroom, found on tree bark in São Paulo state, Brazil, glows green. 5. A firefly squid, also called a sparkling enope squid, emits brilliant light. 6. The northern lights dance above Yellowknife, Canada. 📸 Photos by @davidliittschwager (1, 4, 5), @carstenpeter (2), @thiessenphoto (3), and @ronan\_donovan (6).*

*They're not your usual superheroes. They steal snacks, pick fights, and cunningly run the wild. From the jungle's benchwarmers to wild superzeroes disguised as superheroes with sneaky superpowers, meet nature's most underrated misfits - narrated by @vancityreynolds (yes, its Ryan Reynolds). Watch Underdogs, Premieres June 19, Thursday - Friday 8pm on National Geographic. #Underdogs #NatGeoIndia #NatGeoWild*

She won't say 'I love you' but she'll do this: 😊 Featured here are fierce yet loveable moms of wild! #Repost from @munish.palaniappan 📷 Want to get featured? Upload your pictures & reels and tag us using @natgeoindia and #natgeoindia

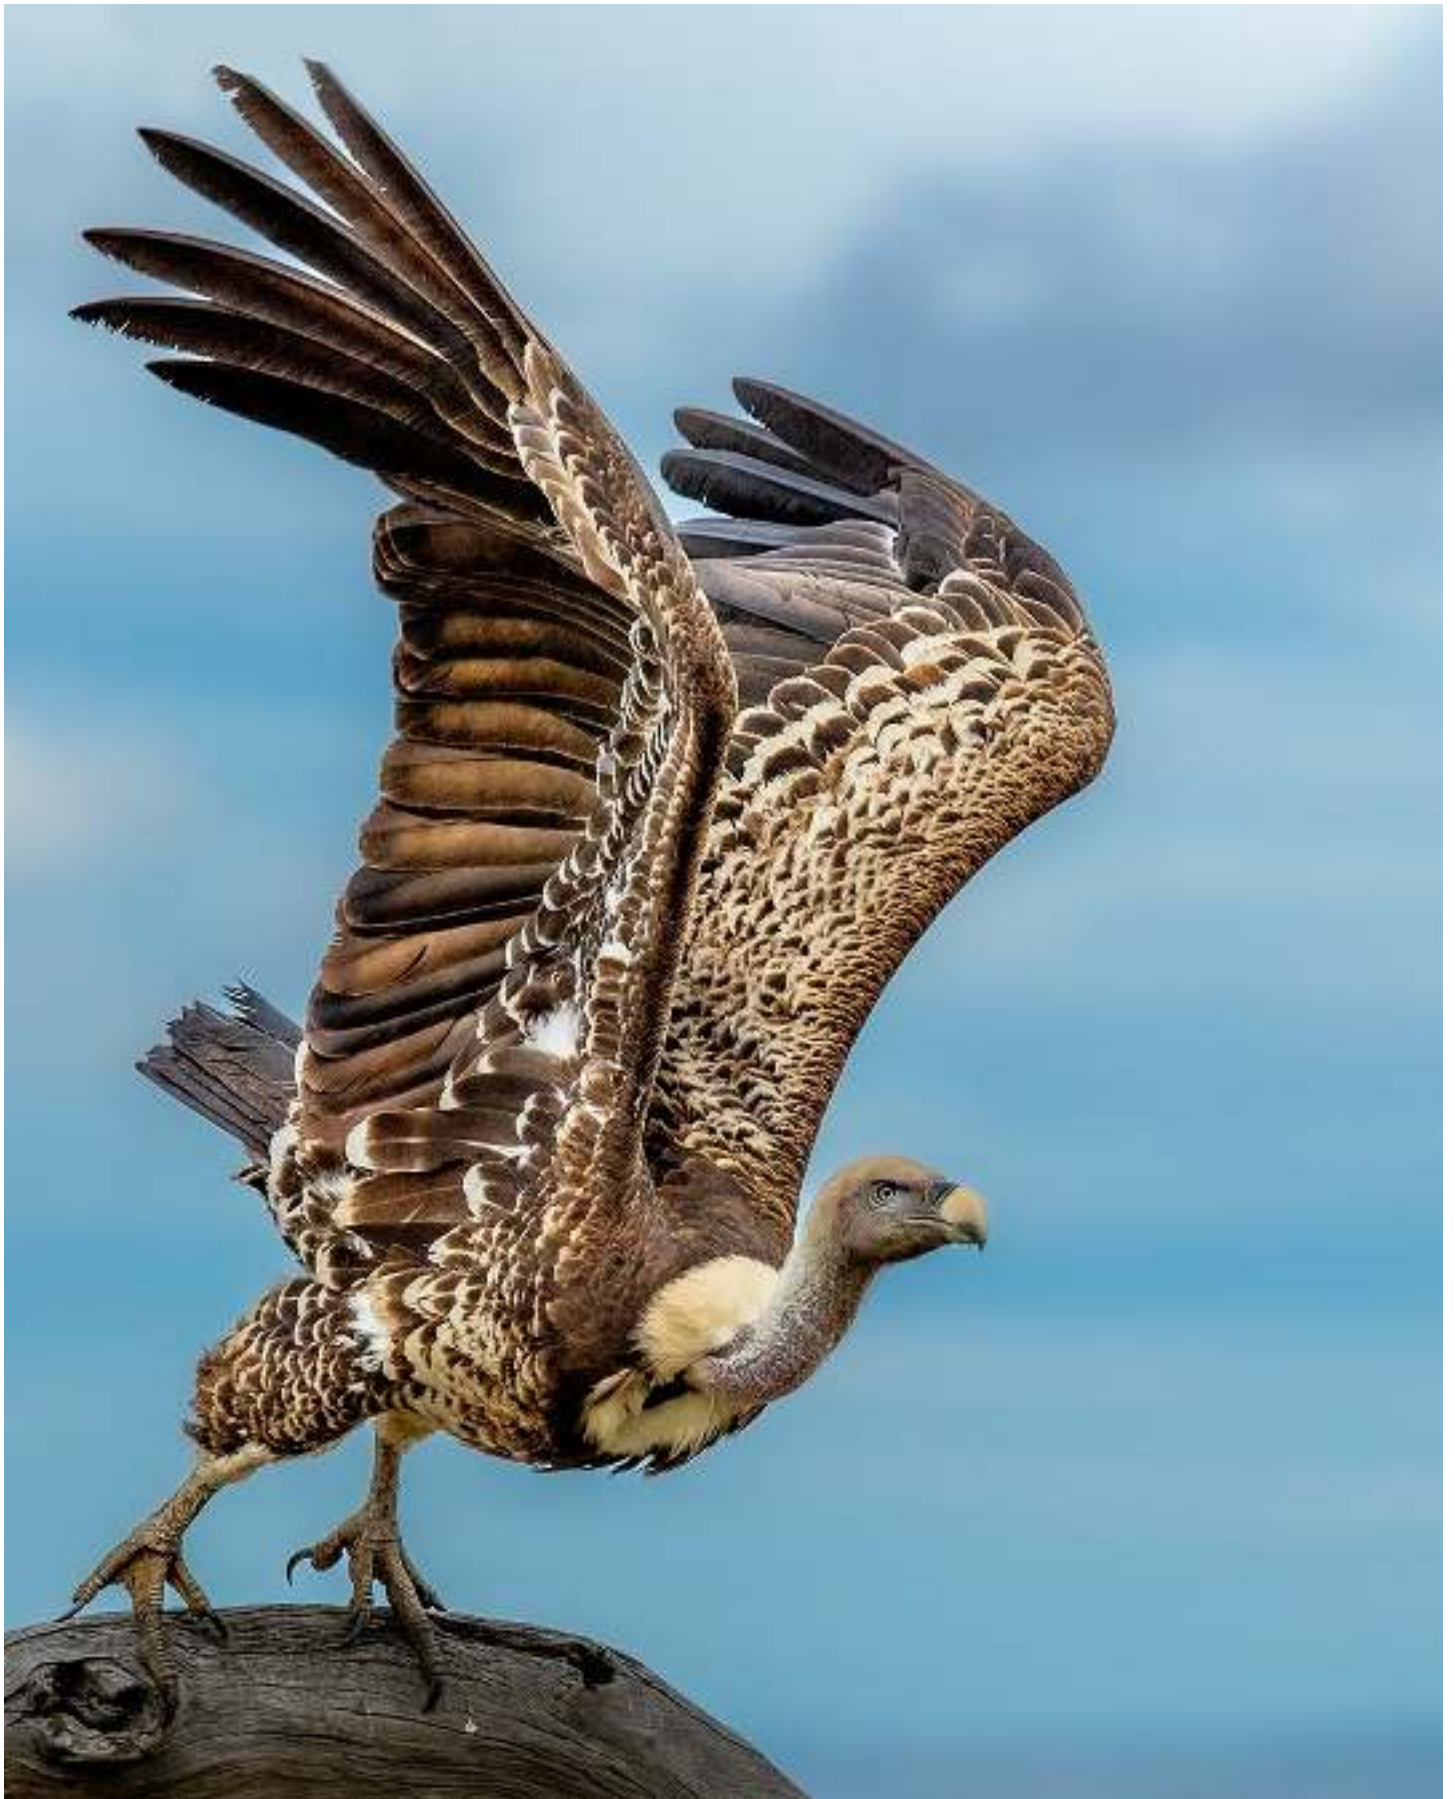

Me, trying something 'fun' I saw online. 🐾 Note: Rotate your screen left. Featured here is a lioness. #DidYouKnow: In the open savanna, lionesses usually do most of the hunting, while males often take food from their kills. #Repost from @priyanshi.nahata 📸 Want to get featured?
